## ABOUT ME

Hi there, my name is Kit MacAllister. I design websites that are functional, good looking, and cross-browser friendly. I've been working in the field for over 6 years. I have both freelance and company experience. Want to know more?...

---

## EDUCATION

Degree: University of New Mexico – Media Arts  
Specialized Education: San Francisco Art Institute

---

## SKILLS

### Communication:

I work well with people, whether they're clients or co-workers. I have both office and public relations experience.

**Code:** XHTML, CSS, PHP, jQuery, AJAX, SVN

**Software:** Adobe Photoshop, Dreamweaver, Coda, MS Office

### Creativity:

Few people are both right and left brained, but I happen to be one of them. That's why I do everything from cutting Photoshop designs to building PHP applications.

---

## EXPERIENCE

### Freelance

As a freelance web-designer I build all of my websites from the ground up; that means working out the mockup with the client, slicing the design, then development. I use Code-Igniter as a framework for all of my websites. Using a PHP framework allows rapid development, including pagination, calendars and HTML email. My websites speak for themselves: take a look.

### Company

I was hired by Statnekov Internet consulting to learn and deploy new technologies including Flash and JavaScript navigation. I'm a fast learner and a good teacher. I built websites with them for two years.

### Media

As a Social Media intern for bioneers.org I was in charge of maintaining Facebook, Twitter, and the Bioneers blog. I understand social media intuitively because that's how I keep in touch! My work for Bioneers included blogging, photography and photo-manipulation.
